DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 69-74 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 61-67 of copending U.S. patent application S.N. 09/876,102, now allowed. Although the conflicting claims are not identical, they are not patentably distinct from each other because, the claims in 09/876,102 are recited in product-by-process form, and the process recited would give rise to structure that would meet the limitations of pending claim 69, for example. Alternatively, a generic claim such as pending claim 69 would be anticipated by the more specific patented claim 61, because a species anticipates a genus, and anticipation is the epitome of obviousness. Three pairs of fins are claimed in patented claim 66, polysilicon is claimed in patented claim 63, and the other features of the pending claims are necessary parts of a stacked capacitor construction.
